ONLINE ACADEMY FOR PROGRAMMING, DATA AND AI

Learn to think with data and AI, not just to use them.

Personalised Python, SQL, AI, Big Data and Data Engineering classes for all ages, with thesis support and career guidance, taught by someone who works in the industry every day.

Rated 5 ★ | Nearly a decade in tech and teaching | Free initial assessment | All ages · online

OPEN CLASSES — Free · Online

Every two weeks, a free open class

We open an online classroom to answer questions live: Python, SQL, data or AI. Bring your questions, even if you're not a student yet. Message us and we'll let you know about the next one.

ABOUT US

Learning is still a human thing

IsAcademy was born from a simple idea: in an increasingly artificial world, real learning needs a person who listens, explains and challenges you.

It was founded by Ismael Sarmiento, a data and AI engineer specialised in data governance and passionate about teaching, with nearly a decade working in the tech industry and training professionals. We bring what companies actually do into every class, with patience, a personal approach and a plan tailored to each student.

We use AI as a tool, never as a shortcut: we want you to understand what you do and to solve problems on your own.

METHOD

Theory you understand, practice you apply

We combine clear explanations, practice with real cases and challenges with visible progress (gamification): you learn by understanding, applying and staying motivated.

1

Solid foundations

Clear explanations, no magic formulas: you'll know the why behind everything.

2

Real practice

From the very first classes you work on real industry cases and projects, not filler exercises.

3

Challenges and visible progress

Clear goals and achievements that keep you motivated and turn study into a habit.

SUBJECTS

What do you want to master?

Private online classes in programming, data and AI. Choose where to start: every subject adapts to your level, from zero to advanced.

PROGRAMMING

Python

From zero to programming with confidence.

PROGRAMMING

Object-oriented programming

Clean, maintainable code design.

DATA AND AI

SQL

Queries and modelling on real databases.

DATA AND AI

Data analytics

From data to decisions.

DATA AND AI

Big Data · Spark

Distributed processing at scale.

DATA AND AI

Data Engineering

Pipelines, orchestration and data quality.

DATA AND AI

Artificial Intelligence

Machine learning and generative AI, with judgement.

GUIDANCE

Thesis support (BSc/MSc)

We guide you from idea to defence. The work is yours; the method and the confidence, ours.

GUIDANCE

Career guidance

Data Engineer, Data Scientist or AI specialist.

WHY US

What makes us different

Real industry experience

You learn from someone who works with data and AI, not just someone who studied them.

Tailored classes

Your level, goals and pace set the plan, not a fixed syllabus.

For all ages

From school to university or your first data job: we adapt the language and the pace to each student.

Using AI wisely

You learn to use AI with judgement, without depending on it.

Personal support

We answer your questions clearly and patiently, without rushing.

Online and flexible

From wherever you are, in the morning, at midday or in the afternoon.

BOOK YOUR CLASS

Shall we start?

Tell us what you want to learn and we'll propose a plan. The initial assessment of your case is free and with no commitment.
